# Application Development – JavaFX

Tutorial 3

If you have not yet completed tutorial 2, take this time to complete it with the guidance of the lecturer/ tutor.

Once Tutorial 2 is completed, attempt the following questions.

Question 1

Create a scrollable JavaFX User Interface with a Menu Bar. An example UI is given below.

Each menu item should consist of sub-menu items according to the below structure.

Menu Structure

- File
    - Save
    - Save As
    - New
    - Open
    - Close
- Edit
    - Undo
    - Redo

- o Find
- o Replace
- View
  - o Window
  - o Views
    - Reading Mode
    - Presentation Mode
    - Normal Mode
    - Web Mode
  - o Zoom
    - Zoom In
    - Zoom Out

Question 2

Replicate the following User Interface using appropriate containers.

Question 3

Create a JavaFX application with 3 TextFields to accept the Title, First Name and Last Name such that when a button is clicked, the contents of the 3 TextBoxes are collectively displayed in a label.

Ex: Title – Mr. , First Name – Kamal, Last Name – Perera

Output – Mr. Kamal Perera
